-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Inoue (5,743,971).

Inoue discloses a gasket comprising a metal plate and film comprising silica and two acids, which can be different (see col. 1:59-65 and col. 2-3:34, particularly col. 3:15, 16, 24, 28-29, and 32-33).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 2, 4-6, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuzaki (2003/0072962).

Matsuzaki discloses a gasket comprising a metal plate (paragraph 49), film (e.g. oxide coating), and an organic layer. The film is made from silica (paragraph 227), an acid, and a metal. The acid can include a phosphoric acid and the metal can be Mn, Mg, or Al. The acid and silica (and metal) can be present in the percentages required by the claims (see paragraphs 235 and 236). Matsuzaki does not specifically state the organic coating is a rubber layer, but

some examples are given in paragraph 156. The selection of a known material based on its suitability for its intended use is not considered inventive. See *In re Leshin*, 125 USPQ 416 (CCPA 1960). Further, it is known that rubber, resins, polyurethanes (which can be a rubber), etc. are known coating layers used in gaskets as evidenced by Teranishi '830 (see col. 6:21-33). Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to make the organic coating a rubber coating/layer.

#### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1, 2, 4-8 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
